# Paragon 31

## Premiere at Boot Düsseldorf

A new 31 foot model from Paragon Yachts that combines clean lines and modern, innovative Scandinavian design with sporty performance and excellent seaworthiness.

Modern design and clean lines with the focus on innovative and integrated functional solutions are some of the properties that contribute to the excellence of the new Paragon 31. Add a high quality hull with unique driving properties, that feels very safe and secure in all weather conditions and you have a boat that stands in a class of its own.

The new Paragon 31 will be introduced on the Boot Messe Dusseldorf, 23-31 January 2010, Hal 4 , Stand nr. B35

The boat is the second model in a wholly new generation of “year-round” boats based on the highly successful Paragon 25 concept. Plenty of stowage space and a layout providing generous space for socialising with all the family, day trips with friends and acquaintances, transport, fishing or other seagoing activities.

Properties include a remarkable quantity of innovative solutions. Apart from the large flat deck surfaces and the sturdy fender beading, the most prominent are the modern design, laminated windows with large panorama front window, sliding doors on both sides and a large, flush glass roof with an openable section. The polyurethane laminated windows in the superstructure provide a pleasingly modern appearance, unique stability and a very quiet saloon. Moreover, the boat offers an after-deck level with the bathing platform and a flying bridge. The roomy and cosy ambience of the light and airy, modern saloon is owed to the tasteful combination of upholstery and cushions in both saloon and cockpit. The helm and instruments are highly functional and very modern, incorporating an entirely new ergonomic design and new colour combinations that reduce light reflection.

The fore-cabin contains a large double berth and a galley. The galley has generously proportioned worktops and stowage space. The cooker is concealed beneath the elegant galley top, which can be folded up quickly and easily. The large head provides full headroom. The aft-cabin contains two full length berths and cleverly designed stowage space.

Paragon Yachts philosophy:

- A hull returning the best possible performance and seagoing properties to withstand the toughest possible conditions at sea.
- Careful pre-study, cooperation and development together with sea rescue services,

coast guard, marine racing drivers and other professionals working in demanding conditions at sea and who know their boats.

- Built for year-round use while being roomy and practical for living aboard.
- Fun to drive, easy to steer and manoeuvre.
- Modern looks, clean lines and innovative design.

General technical specifications:

Length over all (L.O.A.):	9,85 m
Beam:	3,30 m
Draught:	1,10 m
Weight:	3 800 kg
